Professional Summary

Analytics-driven operations professional with 5+ years owning category performance and operational excellence in high-scale e-commerce (Flipkart) and global SaaS (Enverus). At Flipkart I own a marketplace category end to end — tracking seller / partner and SKU performance, pulling growth levers (pricing, assortment, promotions), and driving a 55% category revenue uplift during Big Billion Days under intense timelines. I re-engineer operations for excellence (Lean Six Sigma, 20% faster) and execute across cross-functional teams (category, marketing, supply chain, product). A VIT engineering graduate with a high-ownership, intrapreneurial mindset and proven project and event-operations leadership (directing operations and teams for 1,000+ participants), I thrive on scaling volumes and revenue across geographies while keeping customer and partner experience superlative.
