UK SAVOURY SNACKS

Where PepsiCo grows next

Shopper & portfolio review, with a plan for Acadia Grocers

[Name] · [Date]

THE BRIEF

Grow PepsiCo Savoury penetration and AWOP, especially online

OBJECTIVE

Find the biggest growth opportunities for PepsiCo Savoury by:

(a) picking the top focus categories and brands for all retailers

(b) spotting pack and sub-segment gaps vs competitors

...then turning them into clear actions for one customer, Acadia Grocers.

Penetration = how many shoppers buy. AWOP = spend per buyer.

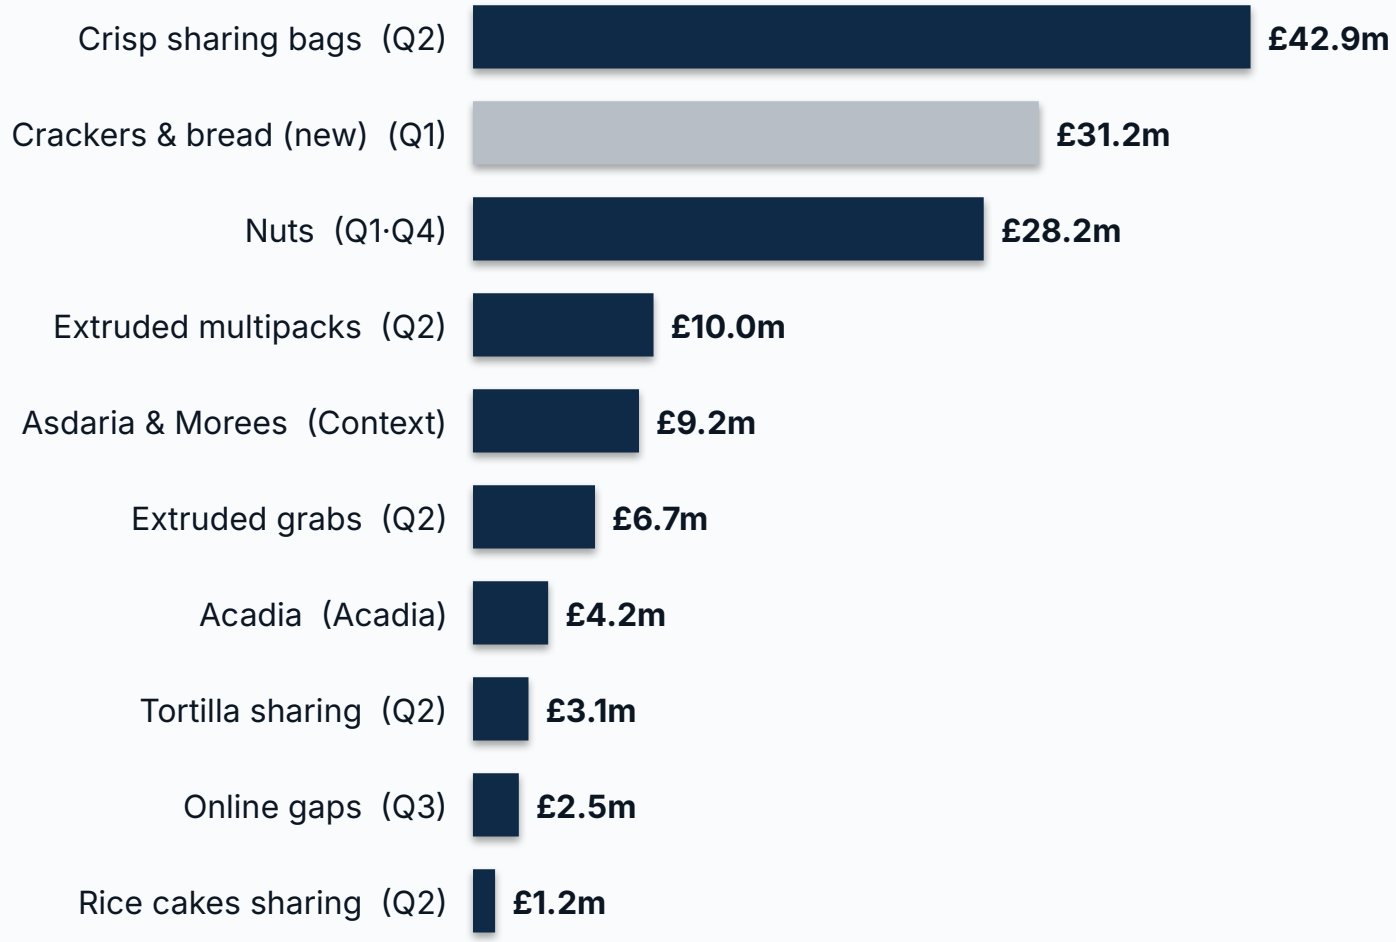

Q1	**Which categories and brands should drive penetration and AWOP?**	Slides 6–7
Q2	**Where are the pack and sub-category gaps vs competition?**	Slide 8
Q3	**How does basket structure differ by channel, and what does it mean for Savoury?**	Slide 9
Q4	**Where can cross-category / cross-brand deals grow the category?**	Slide 10
→	**What should we do at Acadia Grocers?**	Slide 11

What we do: Answer each question with data, then end with prioritised recommendations.

Next → the answer

THE ANSWER ON A PAGE

£107.8m of headroom sits in business PepsiCo already has

THE QUESTION

Where is the growth, and how much is it worth?

HOW TO READ IT

Each bar is the sales PepsiCo adds by reaching its fair share in that area. Navy = existing business, grey = new category. The tag shows which question found it.

WHAT IT SHOWS

- £107.8m in existing business, £31.2m from a new category
- Crisp sharing bags alone: £42.9m
- At 25% capture: £27.0m in year 1 (£16.2m–£37.7m)

What we do: Win sharing bags, fix extruded packs, recover Asdaria, then build nuts.

Next → how we got here

HOW WE LOOKED AT IT

Sales = shoppers × spend per shopper; one chart per question

Sales = **Penetration** how many buy × **AWOP** spend per buyer

	AREA	CHART USED	WHY THIS CHART
Q1	**Categories**	Bubble: growth × our share × size	Shows where to grow spend (big, flat, we lead) vs recruit (growing, we're small)
Q1	**Brands**	Bars: brand vs its own segment	Separates brands to fix from brands to scale
Q2	**Pack gaps**	Columns: £ gap to fair share	Ranks pack gaps by money, so the biggest comes first
Q3	**Channel**	Rings + basket-size bars	Shows online's pull on growth and how baskets differ
Q4	**Deals**	Bars: % who already buy both	Shows which pairs a deal can join up
→	**Acadia**	Columns vs other online	Like-for-like benchmark shows the gap to close

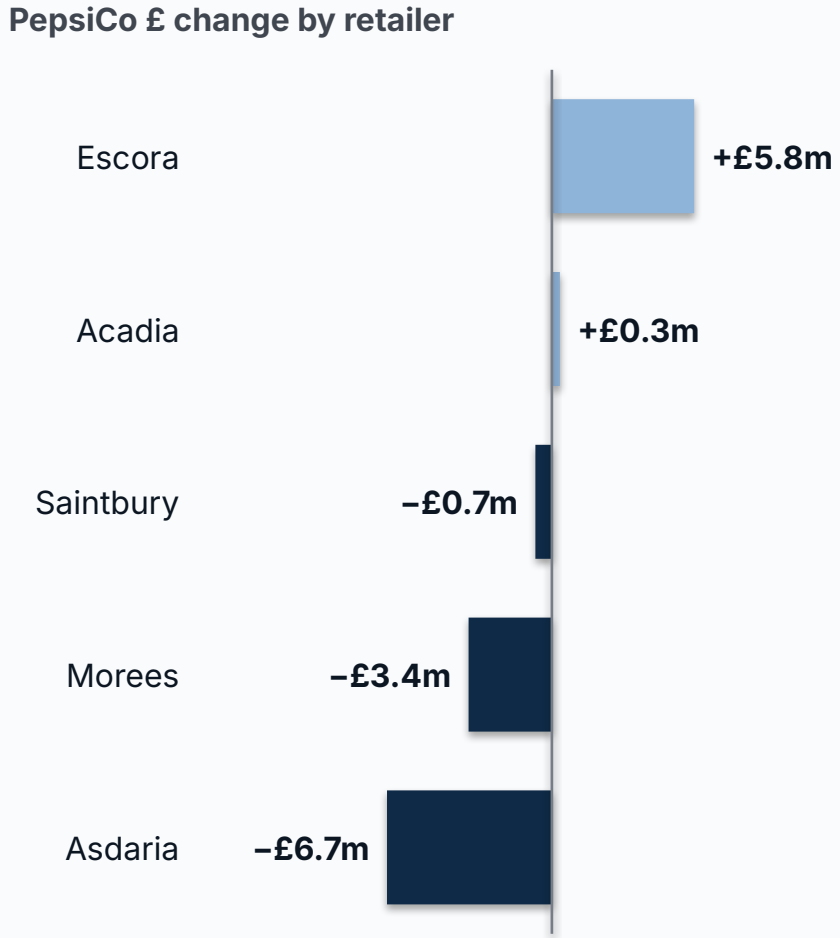

What we do: Every number compares weeks 1–47 of 2025 with the same weeks of 2024.

Next → why act now

CONTEXT · WHY ACT NOW?

The market grows; PepsiCo shrinks, mostly at Asdaria

THE QUESTION

Is PepsiCo keeping up with the market?

HOW TO READ IT

Left: sales growth, this year vs last. Right: where PepsiCo's sales changed, by retailer (navy = loss).

WHAT IT SHOWS

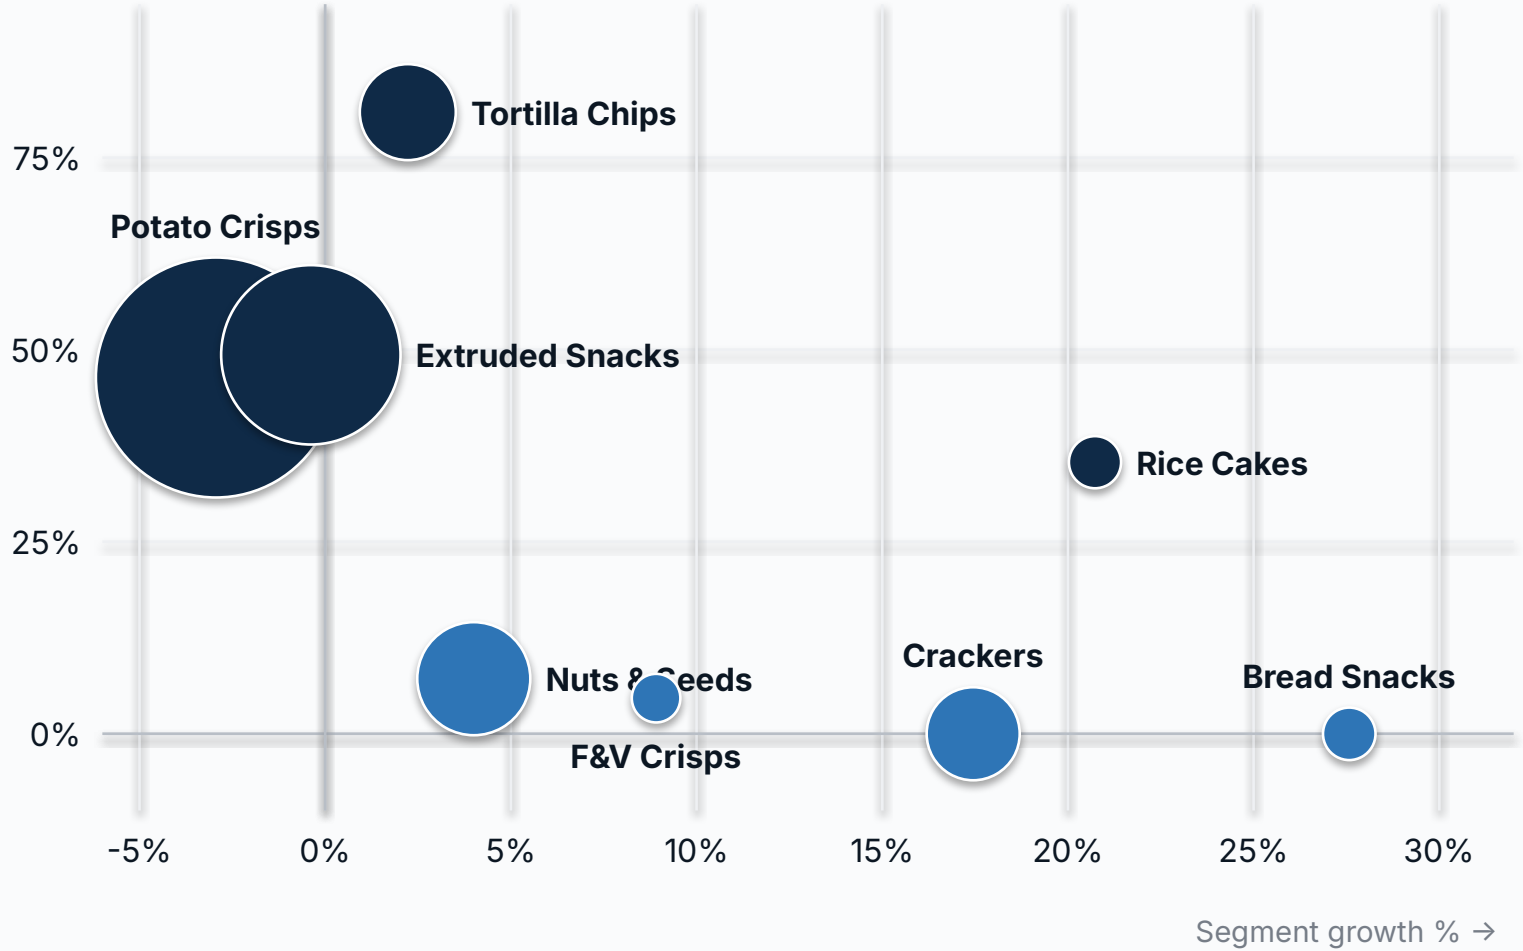

- Market +1.2%, PepsiCo −1.2%
- Share 36.9%, −0.9 pts ≈ −£9.3m of sales
- Asdaria −£6.7m: more than PepsiCo's whole decline (−£4.7m)

What we do: Recover Asdaria & Morees share (£9.2m) while we chase the growth below.

Next → Q1 categories

Q1 · CATEGORIES

Grow spend in the core, recruit in the growth segments

THE QUESTION

Which categories should drive penetration, and which AWOP?

HOW TO READ IT

Across = segment growth; up = PepsiCo share; bubble = segment sales. Top-left: big, flat, we lead. Bottom-right: growing, we're small.

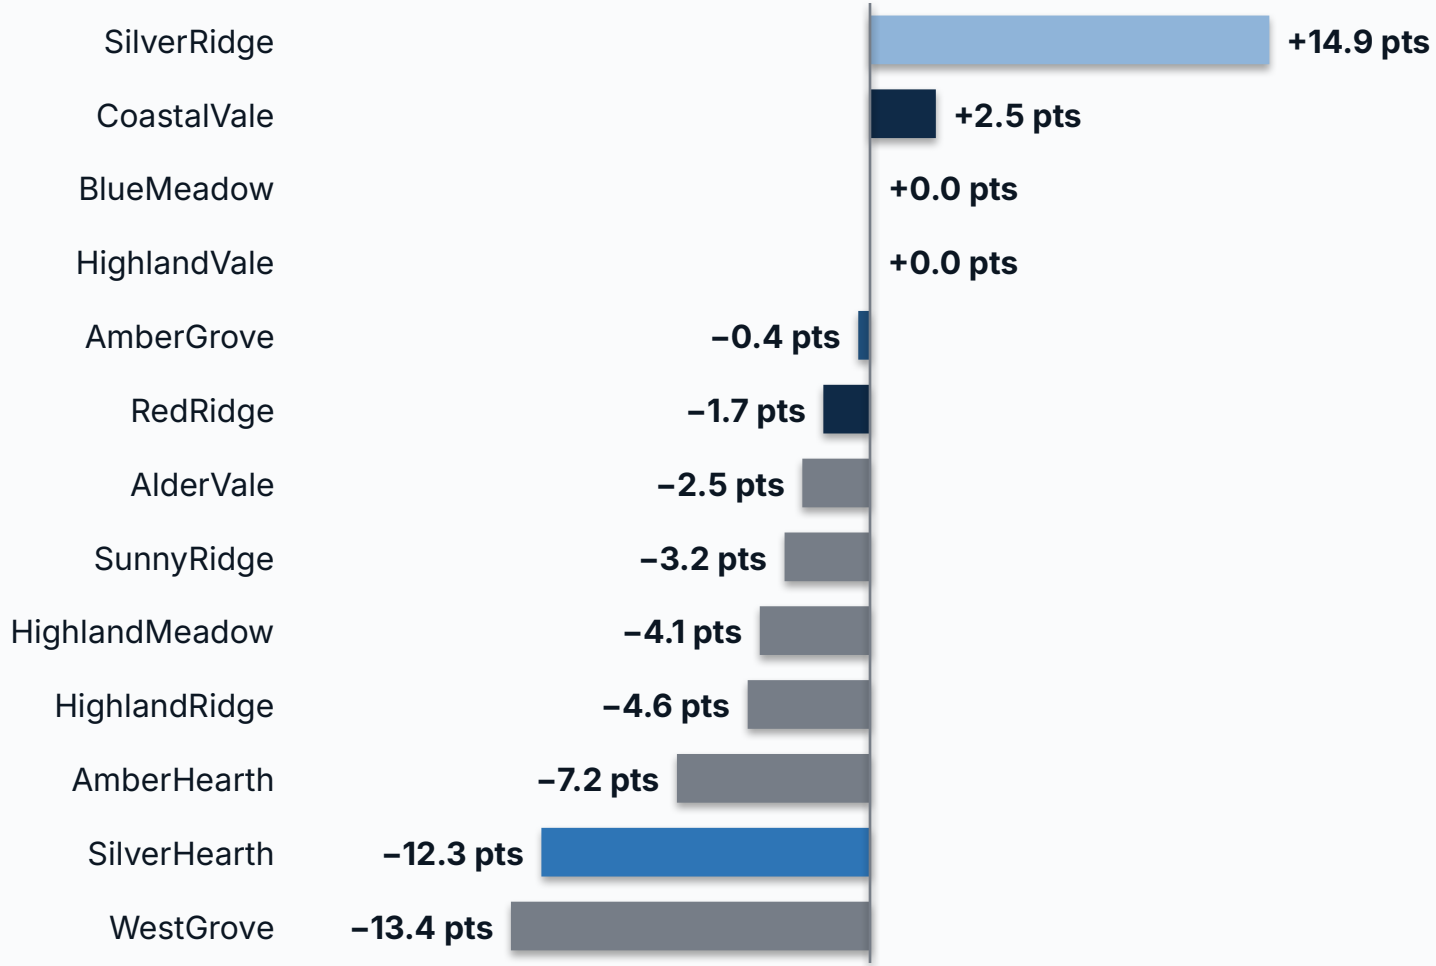

WHAT IT SHOWS

- Crisps + Extruded: 61.7% of sales, −2.9% / −0.4%, we hold 46.4% / 49.3% → AWOP
- Nuts +4.0% (we hold 7.2%), Rice cakes +20.7% (−4.0 pts) → penetration
- Crackers +17.4%, Bread +27.6%, we hold 0% → entry option

What we do: Multipacks and bigger packs in crisps & extruded; recruit into nuts and rice cakes.

Next → Q1 brands

Fix 7 brands that trail their segment; back the growers

THE QUESTION

Which brands should carry penetration and AWOP?

HOW TO READ IT

Bar = brand growth minus its own segment's growth. Grey = falling and behind (fix); light blue = growing 10%+ (scale); navy = grow spend; blue = recruit.

WHAT IT SHOWS

- 7 brands, £131.0m of sales, trail their segment (WestGrove −13.4 pts)
- CoastalVale, £129.1m, beats crisps by +2.5 pts → AWOP anchor
- SilverRidge, HighlandVale, WildRidge (+118.7%) → scale

What we do: Root-cause the 7 brands that trail; put distribution behind the 3 growers.

Next → Q2 pack gaps

Crisp sharing bags are the biggest gap: £42.9m

THE QUESTION

Where are the pack and sub-segment gaps vs competitors?

HOW TO READ IT

Bar = sales we add if our share in that pack matched our share of the whole segment (fair share).

WHAT IT SHOWS

- Crisps: we hold 46.4% of the segment but 20.1% of its sharing bags → £42.9m
- Sharing is 37.8% of the market; we hold 25.6% and price 17.9% above it
- Extruded multipacks + grabs: £16.7m

What we do: Fix sharing-bag price and pack size first; list extruded multipacks and grabs.

Next → Q3 channels

Q3 · BASKET STRUCTURE BY CHANNEL

Online is a small share of sales but most of the growth

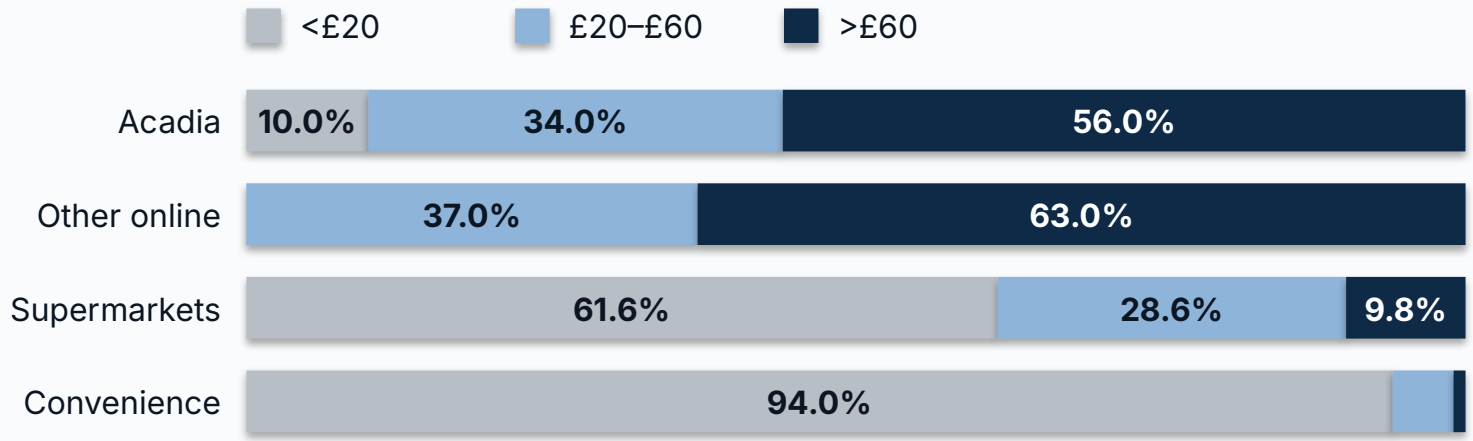

17.0%
online of sales

81.5%
online of growth

49.0% vs 23.0%
baskets with nuts & snacks, online vs in-store

£4.2 vs £2.8
spend per nuts & snacks basket

THE QUESTION

How does basket structure differ by channel, and what does it mean for Savoury?

HOW TO READ IT

Rings: online's share of sales vs of growth. Tiles: nuts & snacks in baskets. Bars: share of baskets by value.

WHAT IT SHOWS

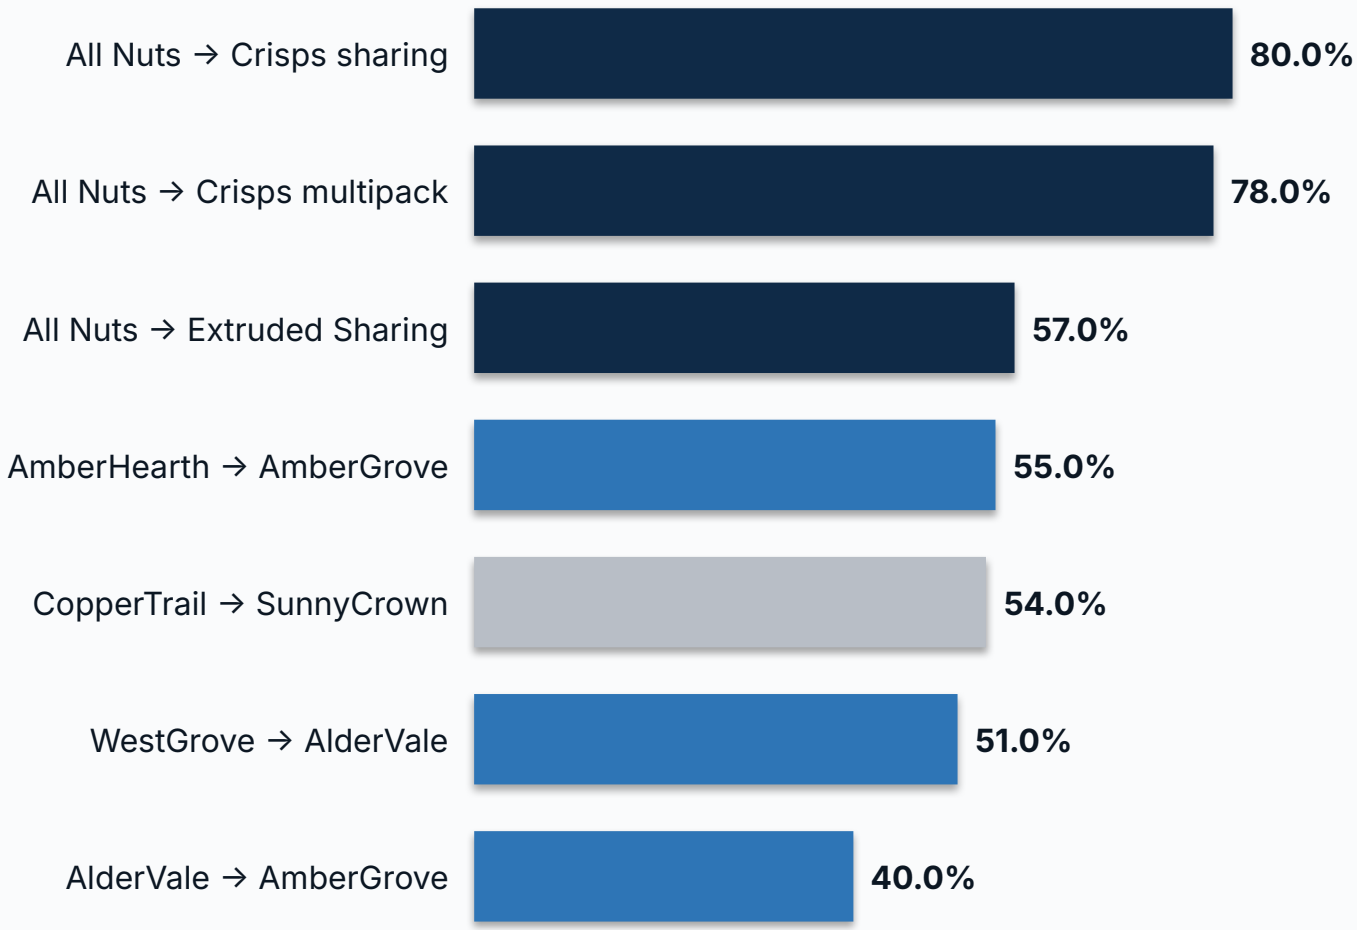

- Online = 17.0% of sales but 81.5% of growth
- 63.0% of online baskets are over £60 vs 9.8% in supermarkets
- Nuts & snacks in 49.0% of online baskets vs 23.0% in-store
- Acadia: 10.0% of baskets are top-ups under £20

What we do: Online: multipacks & bigger packs, win search. Acadia: add grabs for top-ups.

Next → Q4 deals

Q4 · CROSS-CATEGORY & CROSS-BRAND DEALS

Nuts + crisps: 8 in 10 nuts buyers already buy sharing crisps

THE QUESTION

Where can cross-category or cross-brand deals grow the category?

HOW TO READ IT

Bar = % of buyers of the first item who also bought the second (52 weeks). Navy = across categories; blue = within PepsiCo; grey = competitor.

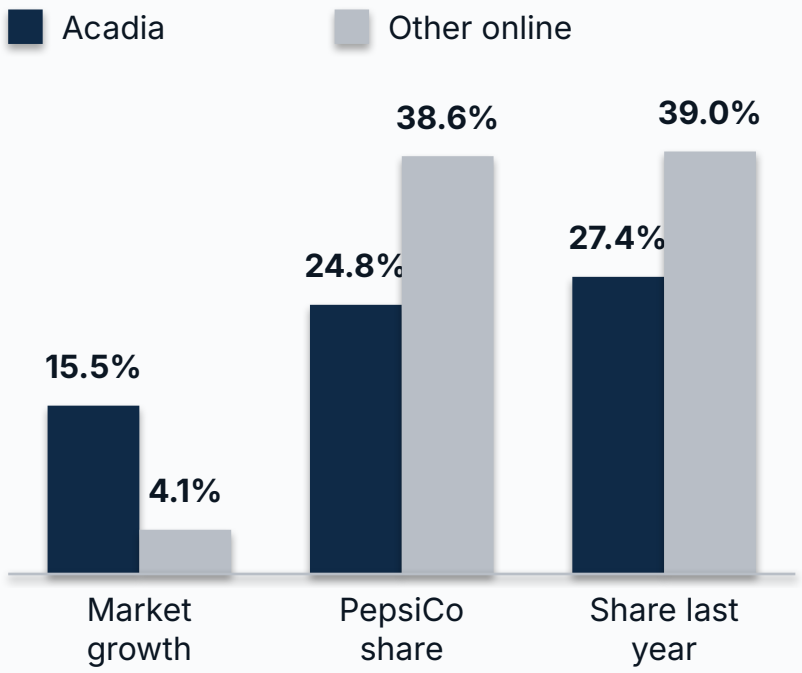

WHAT IT SHOWS

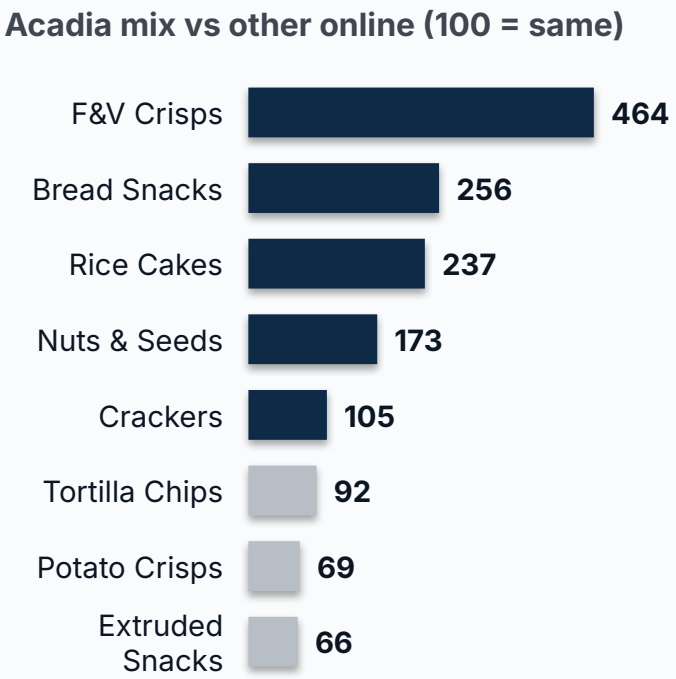

- 80.0% of nuts buyers buy crisp sharing bags; we hold only 7.2% of nuts
- 40.0–55.0% of buyers already take two PepsiCo brands
- Popcorn: we hold 0.2%, segment −1.4% → no deal

What we do: Nuts + sharing-crisps bundle; mix-and-match across PepsiCo brands online.

Next → Acadia

Acadia grows fast, but we're 13.7 pts behind other online retailers

THE QUESTION

What should PepsiCo do at Acadia Grocers?

HOW TO READ IT

Left: Acadia vs other online retailers. Right: what Acadia shoppers buy more or less of (index).

WHAT IT SHOWS

- Market +15.5% vs +4.1%; our share 24.8% vs 38.6%
- Our share fell 2.6 pts in a year
- Shoppers lean healthier: F&V 464, bread 256, rice cakes 237, nuts 173
- Matching other online = £4.2m

1 Range
Tortilla & extruded sharing

2 Healthier
Rice cakes & nuts

3 Bundle
Nuts + crisps

4 Search
Top slots, sharing

What we do: 8-week Acadia pilot: range, healthier lines, nuts + crisps bundle, search.

Next → recommendations

RECOMMENDATIONS

Six moves, each traced back to the question that found it

#	MOVE	FROM	EVIDENCE	HEADROOM	WHEN
1	**Crisp sharing bags**	Q2	20.1% vs 46.4% share	**£42.9m**	Now
2	**Extruded multipacks + grabs**	Q2	41.1% vs 49.3%; grabs 0.0%	**£16.7m**	Now
3	**Asdaria & Morees recovery**	Context	Asdaria −£6.7m	**£9.2m**	Now
4	**Acadia + online gaps**	Acadia · Q3	24.8% vs 38.6% share	**£6.7m**	Now
5	**Nuts via crisps cross-buy**	Q1 · Q4	80.0% overlap, 7.2% share	**£28.2m**	Next
6	**Crackers & bread entry**	Q1	+17.4% / +27.6%, 0% share	**£31.2m**	Later

What we do: Approve the sharing-bag test, the Acadia pilot and an Asdaria plan (year-1 £27.0m). **Next → next 90 days**

NEXT 90 DAYS

Test, read, then scale

	Days 0–30	Days 31–60	Days 61–90
Crisp sharing (Q2)	Price & pack design	Test in 2 retailers	
Extruded packs (Q2)	Range review	Multipack & grabs listings	
Asdaria / Morees	Find the cause	Share recovery	
Acadia (Q3, Q4)	Range & search audit	Nuts + crisps pilot	
Data	Get panel data		Crackers case

What we do: Track penetration, spend per buyer, share by pack and online share for every pilot.

Next → assumptions

ASSUMPTIONS

What the numbers rest on

Weeks 1–47

2025 vs 2024, like-for-like (2025 data ends at week 47)

Fair share

Our share of the segment is the bar for each pack

15–35%

Year-1 capture of the headroom; a planning range

No panel data

Penetration and AWOP are inferred, not measured
