UK SAVOURY SNACKS · SHOPPER & PORTFOLIO STRATEGY

Where PepsiCo Savoury wins next

From a flat market and slipping share to a prioritised, sized growth plan, with Acadia Grocers as the first customer to activate

Leadership readout · VP Sales · [Presenter] · [Date]

PepsiCo is shrinking in a growing market, but ~£108m of headroom sits in brands, packs and customers it already has

36.9%

PepsiCo share, -0.87 pts ≈ −£9.3m; PepsiCo sales -4.7m while the market grew +1.2%

−£6.7m

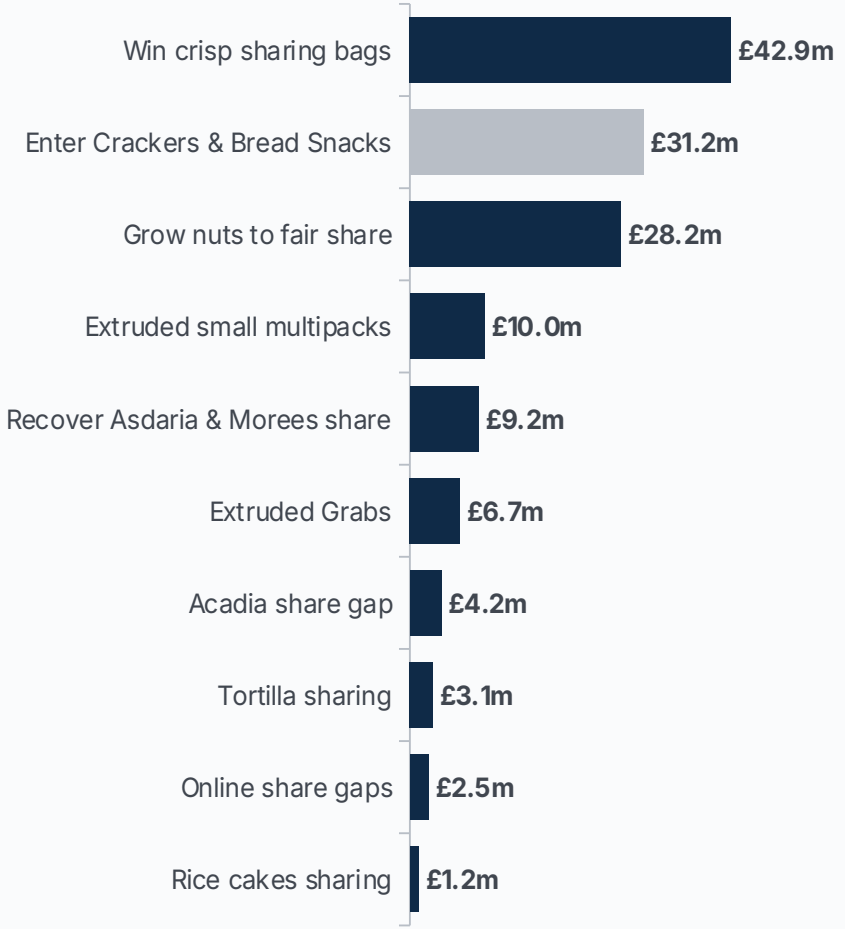

lost at Asdaria alone: more than PepsiCo's whole net decline

82%

of market growth comes from online, only 17% of sales; online baskets 2.1× more likely to hold nuts & snacks

20% vs 46%

PepsiCo share in crisp sharing bags vs crisps overall: the largest single gap

Fair-share headroom £m · grey = new category

THE PRIZE (YEAR 1)

£27m

base case: 25% of £108m core headroom (range £16–38m)

DECISIONS TODAY

- Sharing-bag price-pack test
- Acadia 8-week nuts + crisps pilot
- Asdaria share-recovery plan
- Fund shopper-panel data

Source: case data, 2025 wk 1–47 vs 2024 wk 1–47 (like-for-like) · Calculations: workbook › 11_Opportunities

One goal, one growth equation, five questions that cover the problem without overlap

Sales = **Penetration** how many shoppers buy × **AWOP** spend per buyer

Every recommendation pulls one of these two levers, or both. The brief asks for exactly these two.

Grow PepsiCo Savoury penetration & AWOP, especially online

	QUESTION	METHOD	
Where to play	**Q1 · categories & brands**	Growth × share matrix; brand vs its segment	Slides 5–6
What to sell	**Q2 · pack & sub-segment gaps**	Fair-share benchmark	Slide 7
Where shoppers buy	**Q3 · channel baskets**	Channel & basket-mission contrast	Slide 8
How baskets grow	**Q4 · cross-buy deals**	Co-purchase → affinity	Slide 9
Activate	**Acadia Grocers plan**	Retailer vs peer benchmark	Slide 10

Source: case data, 2025 wk 1–47 vs 2024 wk 1–47 (like-for-like)

DATA
Acadia + baskets + shoppers

MINDSET

- **Answer first**
- **MECE breakdown**
- **Like-for-like (wk 1–47)**
- **Benchmark vs fair share**
- **Triangulate 4 data tabs**
- **Size before prioritising**
- **State every assumption**
- **Test before scaling**

KNOWN
Weekly sales by retailer, pack, brand; basket bands; shopper profile; co-buy %

UNKNOWN
Penetration & AWOP by brand; affinity; margins; elasticity

ASSUMED
Fair share = segment share; 15/25/35% capture; roles by rule

Source: case data, 2025 wk 1–47 vs 2024 wk 1–47 (like-for-like) · Calculations: workbook › 12_Formulas

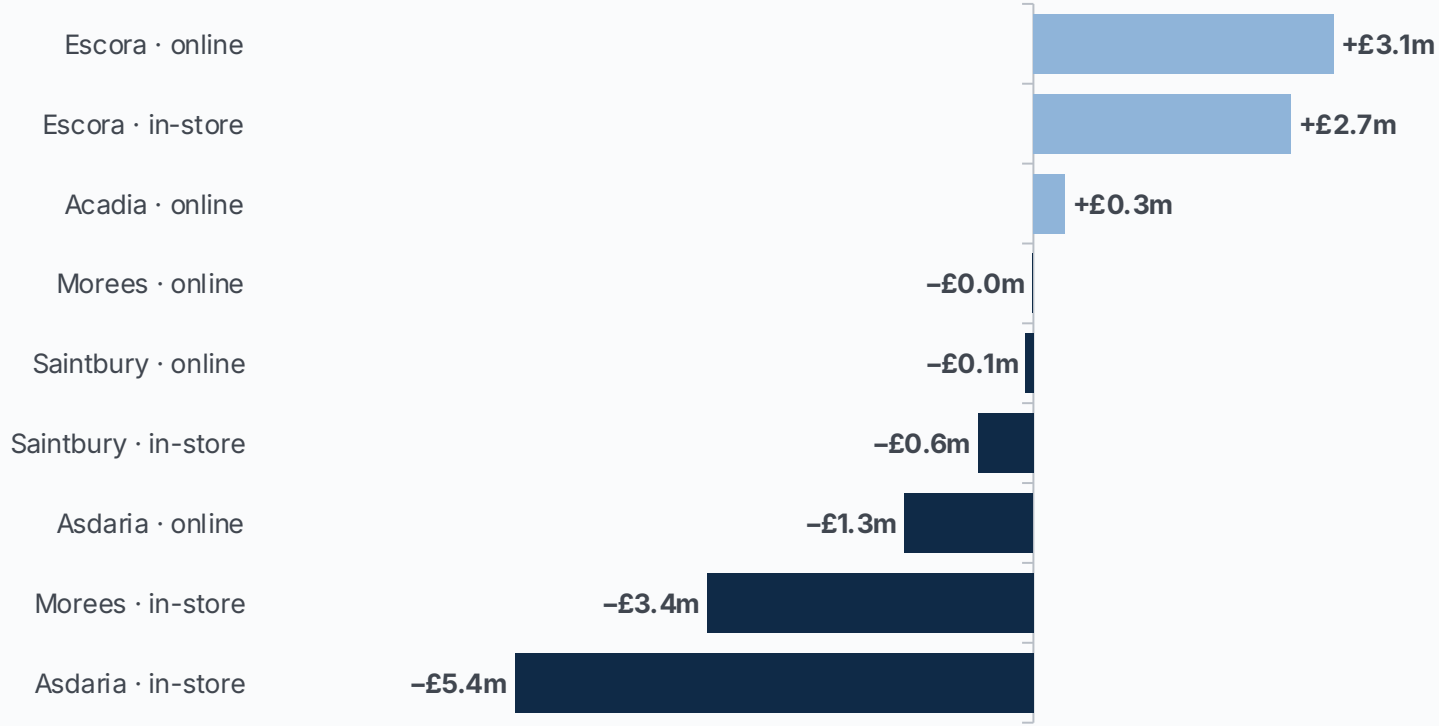

Market +1.2%, PepsiCo -1.2%; Asdaria explains more than the whole decline

£1,077m
market, +1.2% vs YA

£398m
PepsiCo, -4.7m (-1.2%)

-0.87 pts
share (36.9%) ≈ −£9.3m of sales

−£6.7m
PepsiCo change at Asdaria (in-store + online)

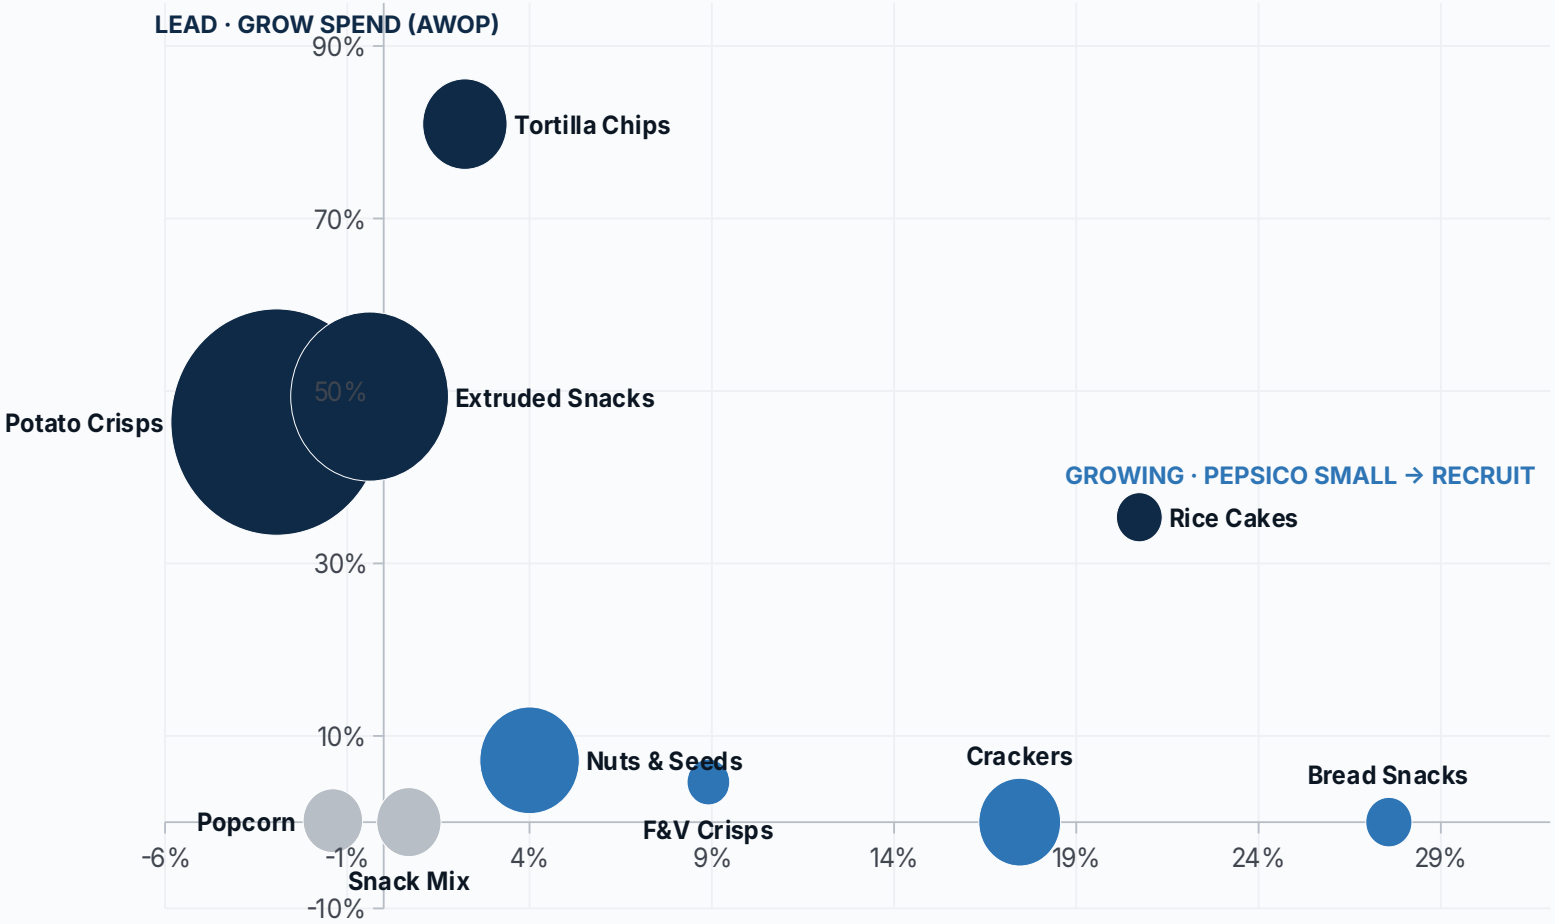

METHOD PepsiCo £ change = PepsiCo TY − PepsiCo YA, by retailer × channel

SO WHAT

- Asdaria (−3.8 pts in-store) and Morees (−1.5 pts) drive the leak
- Escora is the bright spot: PepsiCo +12.8% online
- Recovering last year's share at Asdaria & Morees = £9.2m

Source: case data, 2025 wk 1–47 vs 2024 wk 1–47 (like-for-like) · Calculations: workbook › 4_Retailers

PepsiCo leads the big, flat segments and is small or absent where the market grows

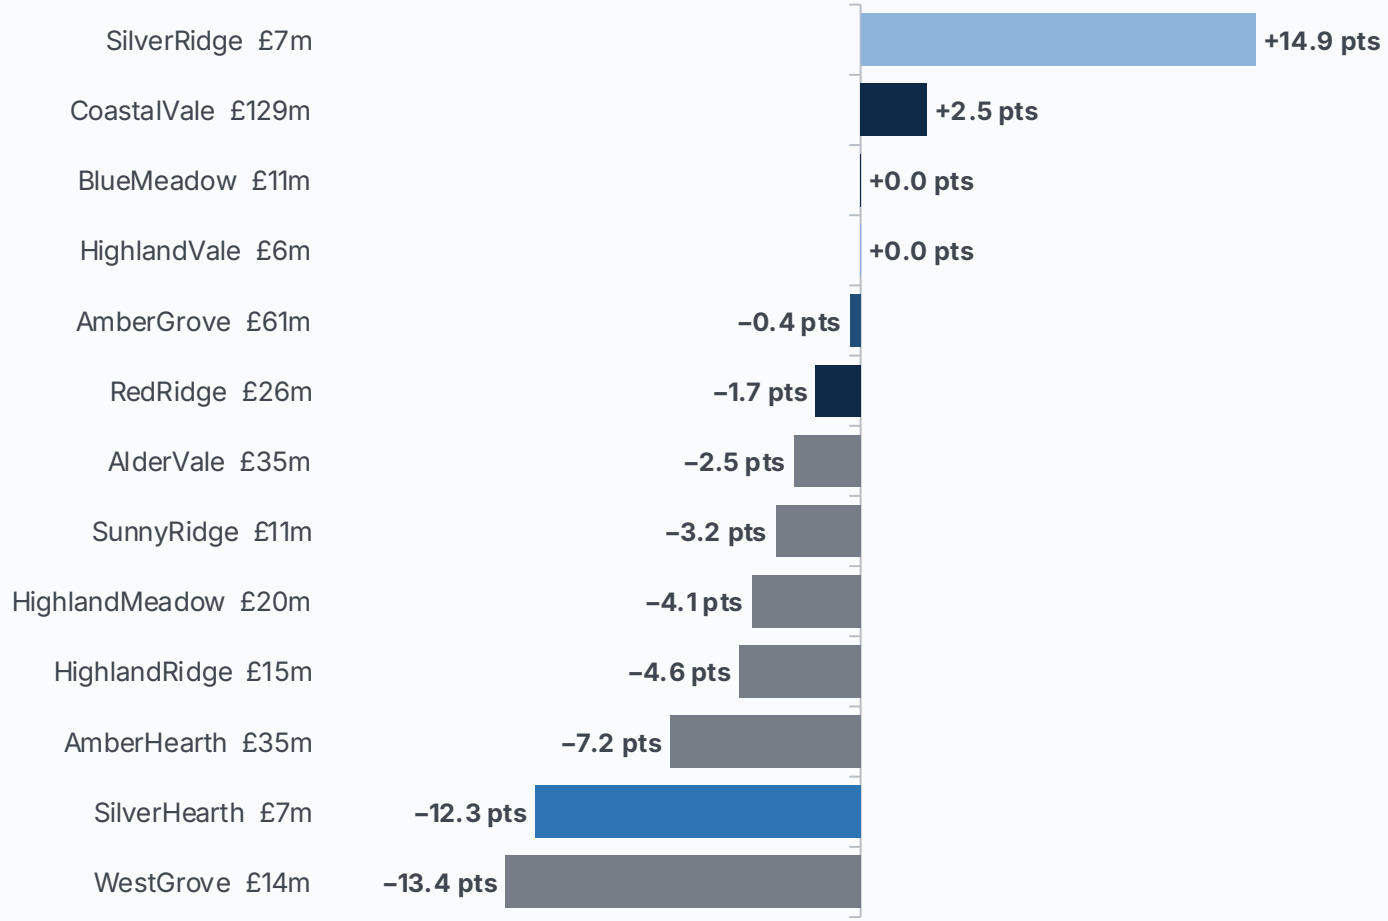

x = segment growth %, y = PepsiCo share %, bubble = sales £m

SO WHAT

- Crisps + Extruded = 62% of sales, PepsiCo ~46–49% share, both declining → grow AWOP
- Nuts (+4%, 7% share) and Rice Cakes (+21%, −4 pts) → recruit (penetration)
- Crackers & Bread (+17–28%, 0%) → entry option
- Popcorn (−1.4%, 0.2%) → low priority

METHOD Growth = TY ÷ YA − 1; share = PepsiCo £ ÷ market £

7 brands worth ~£131m are falling faster than their segment: fix them before scaling the winners

Brand growth minus its main segment's growth (pts); colour = role. WildRidge (+119%, £4.5m) off scale → Scale.

AWOP · £171m
CoastalVale, RedRidge, BlueMeadow, MeadowMeadow, CoastalCrest

Fix · £131m
AlderVale, AmberHearth, HighlandMeadow, HighlandRidge, WestGrove

Penetration · £7m
SilverHearth

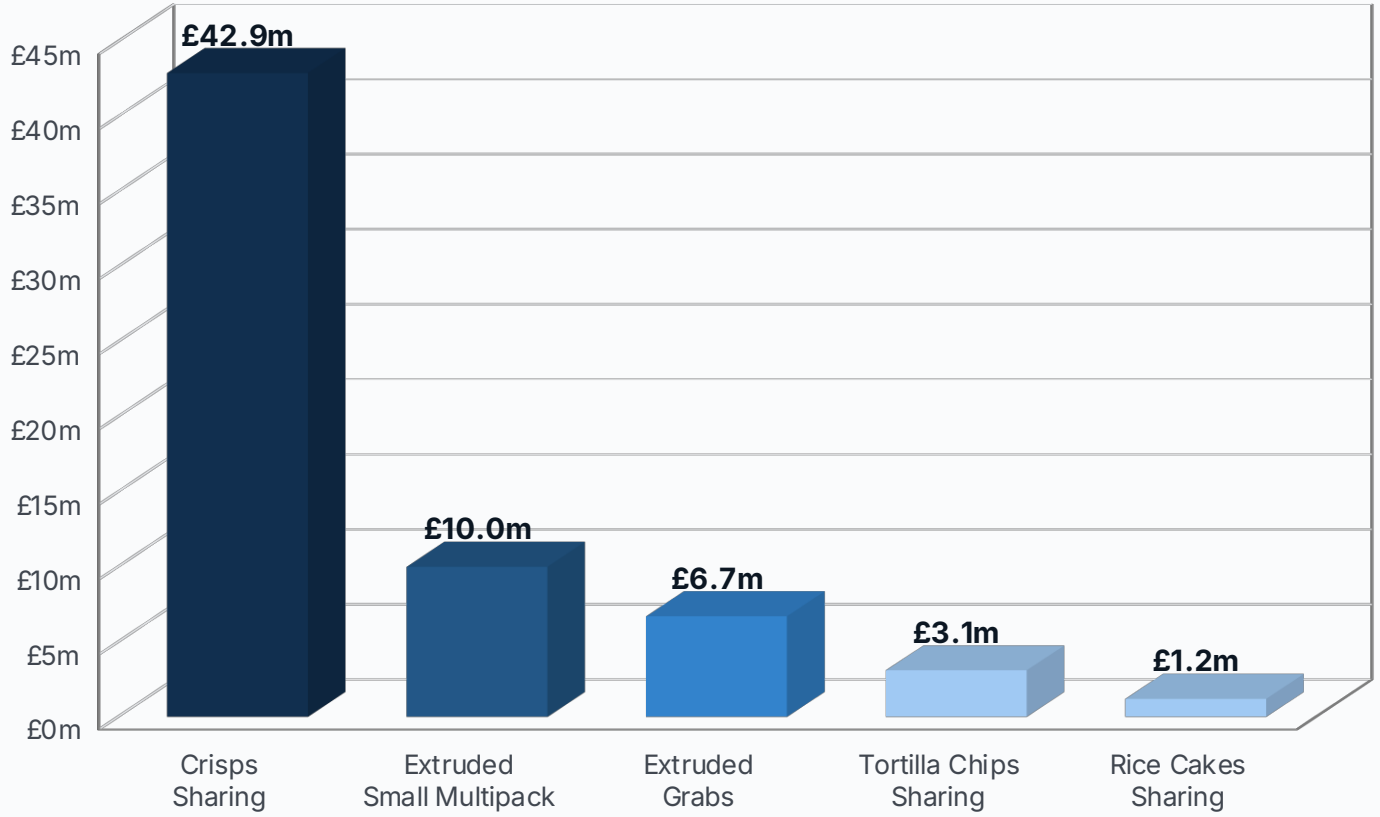

Scale · £22m
SilverRidge, HighlandVale, WildRidge, CopperTrail, CedarMeadow

Defend · £61m
AmberGrove

METHOD Role rule: Fix if declining > 2 pts below segment; Scale if ≥ +10%...

Source: case data, 2025 wk 1–47 vs 2024 wk 1–47 (like-for-like) · Calculations: workbook › 3_Brands

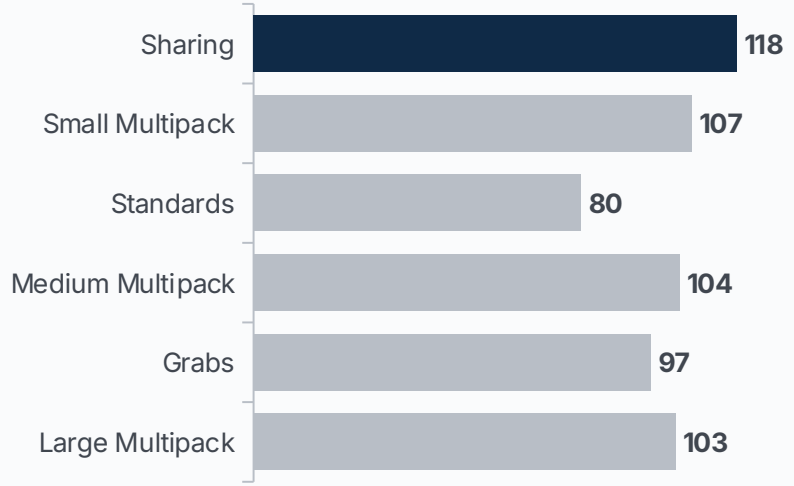

Crisp sharing bags are a £43m gap; extruded multipacks and grabs add another £17m

METHOD

Headroom = pack sales × (PepsiCo share of sub-segment − PepsiCo share in that pack)

PEPSICO PRICE INDEX BY PACK (100 = MARKET)

SO WHAT

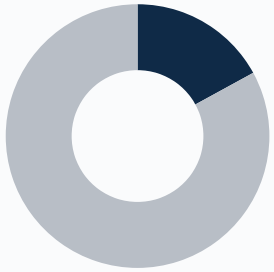

- Sharing is the biggest pack (38%) with PepsiCo at 26% share and an 18% price premium
- Lead with price-pack architecture (size and price point) before price cuts

Source: case data, 2025 wk 1–47 vs 2024 wk 1–47 (like-for-like) · Calculations: workbook › 10_Whitespace · 2_Packs

Online is 17% of sales but 82% of growth: a planned, big-basket, snack-rich channel

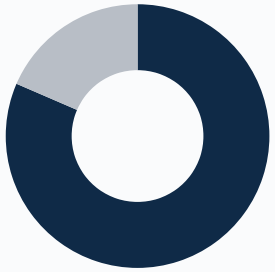

ONLINE SHARE OF SALES

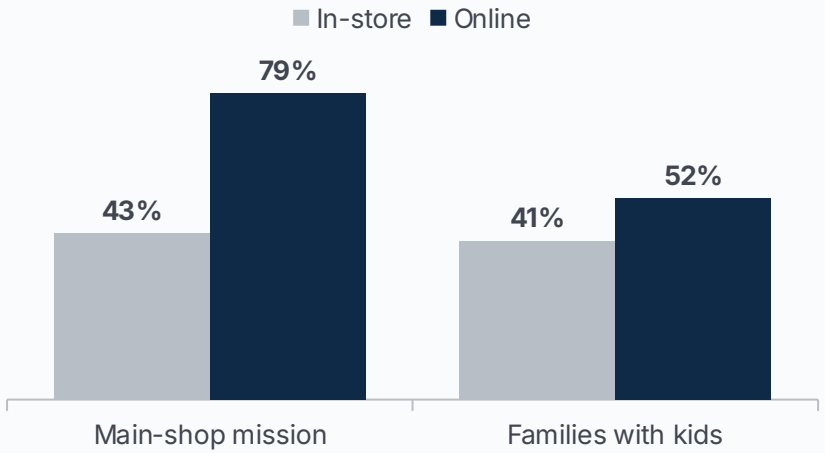

17%

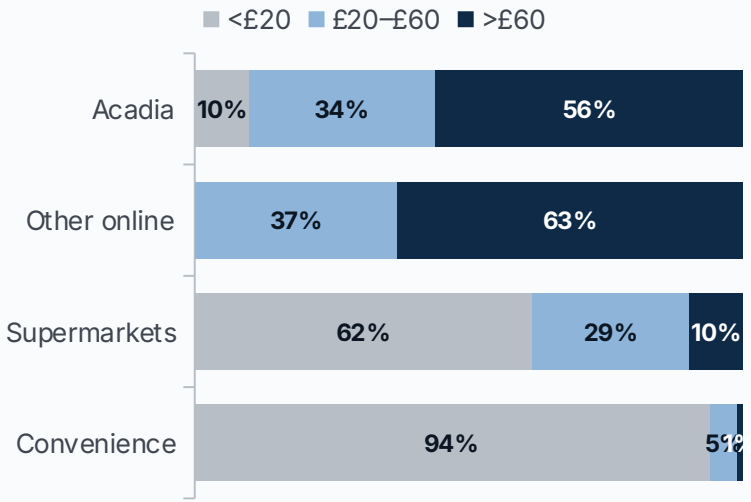

ONLINE SHARE OF GROWTH

81%

% of baskets by value band

49% vs 23%

baskets with nuts & snacks, online vs in-store (2.1×)

£4.20 vs £2.80

spend per nuts & snacks basket (+50%)

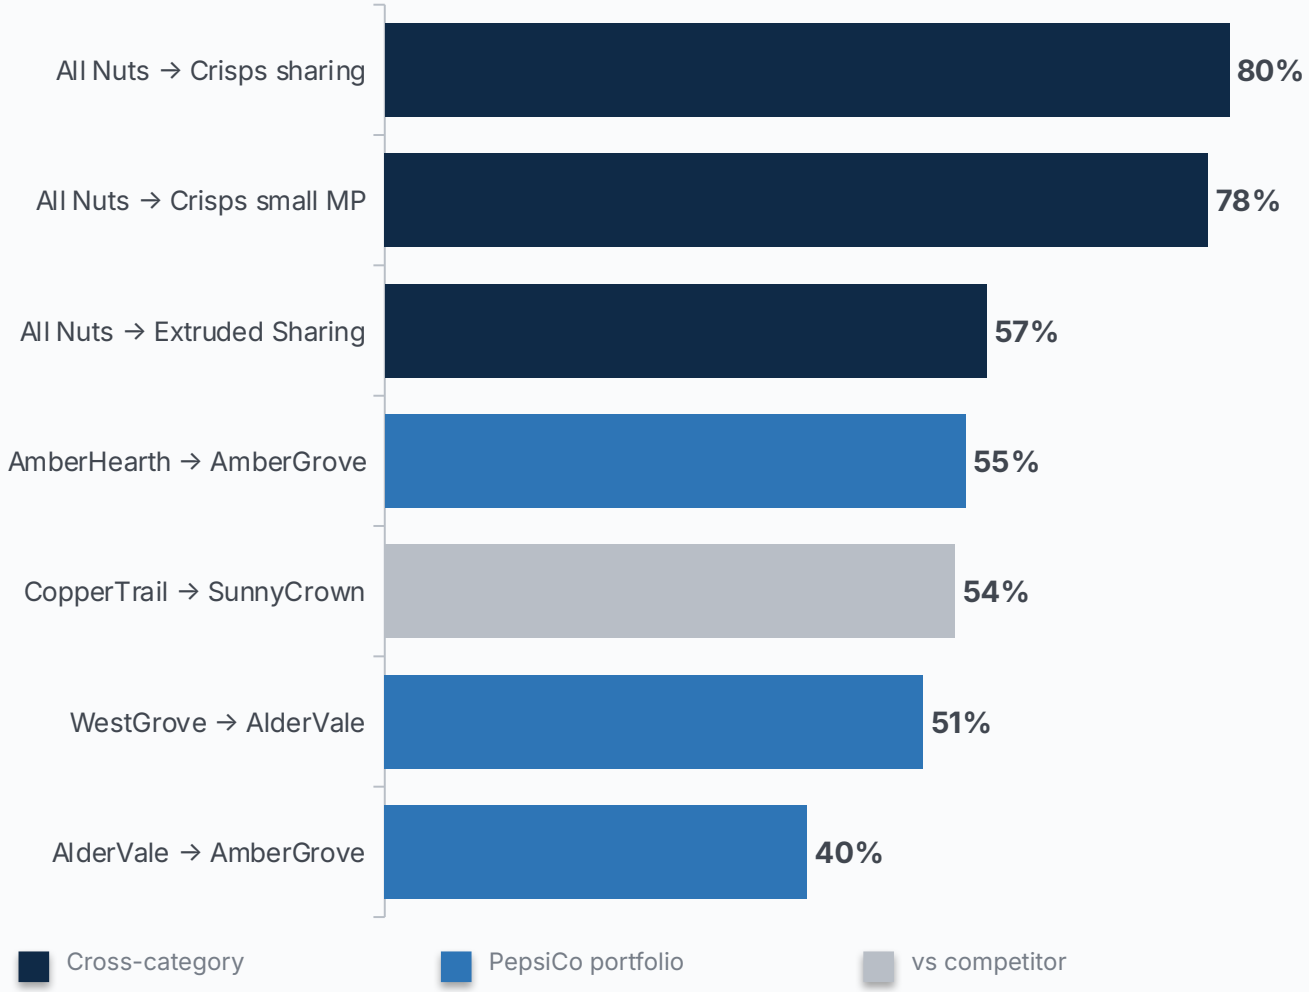

SO WHAT

– Online baskets are planned main shops (63% over £60): sell multipacks and larger formats, win search and 'add to basket'

– Acadia is the exception: 10% of baskets under £20, a top-up mission no other online retailer has → grabs and singles

Source: case data, 2025 wk 1–47 vs 2024 wk 1–47 (like-for-like) · Calculations: workbook › 5_Channel · 6_Baskets · 7_Shoppers

8 in 10 nuts buyers also buy sharing crisps: a ready-made bundle to recruit nut buyers

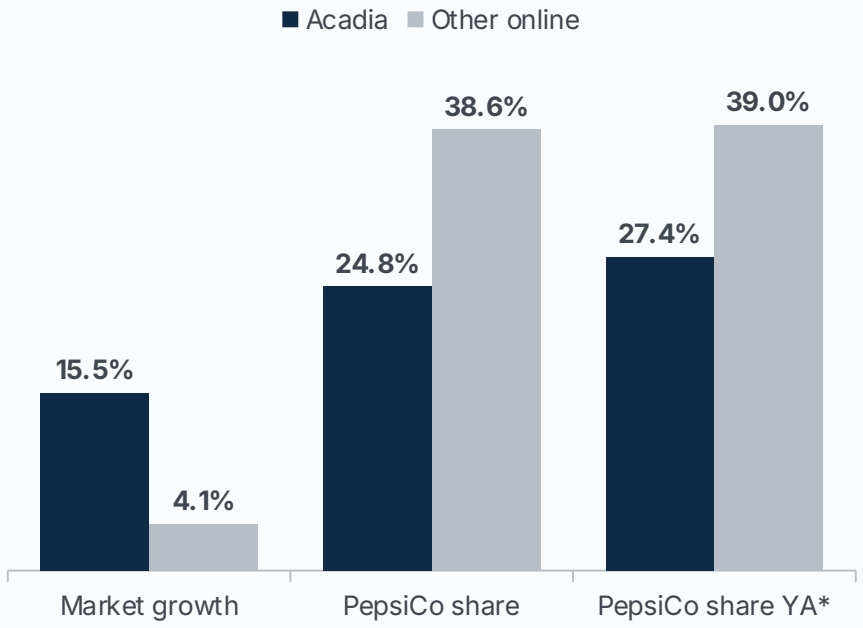

DEALS TO RUN

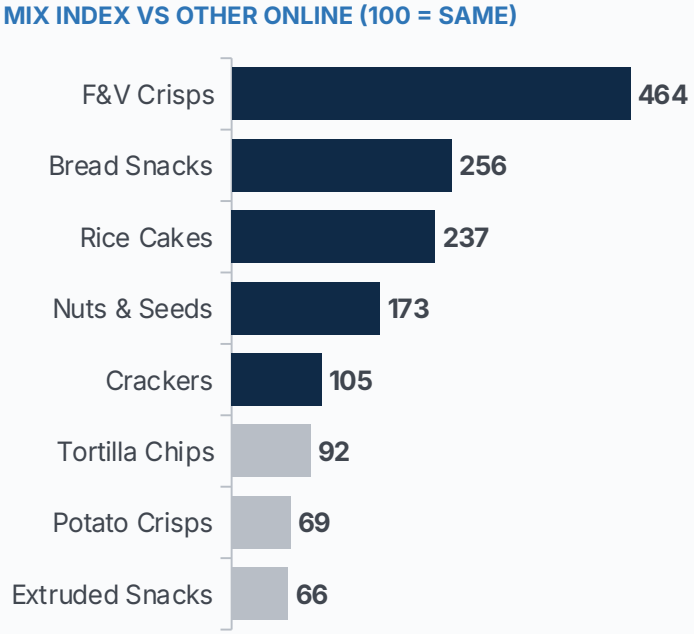

- Nuts + crisps bundle: recruit PepsiCo nuts (7% share) from crisp buyers
- Mix-and-match across PepsiCo brands online (40–55% already cross-buy)
- Popcorn: PepsiCo 0.2% share, segment −1.4% → not a priority

METHOD Affinity = co-buy % ÷ base penetration; needs panel data

A high % can simply mean crisps are bought by everyone. Validate with the affinity index before sizing.

Acadia grows almost 4× faster than other online retailers, yet PepsiCo is 14 pts under-shared and slipping

-2.6 pts*

implied PepsiCo share loss at Acadia in a year

43% · 14%

sharing = 43% of Acadia sales; PepsiCo share in it 14% (20% other online)

£4.2m

Acadia sales × (38.6% − 24.8%) share gap

1 · Range

Add PepsiCo extruded & tortilla sharing (gaps −12, −25 pts)

2 · Healthier

Lead with rice cakes & nuts (mix idx 237, 173)

3 · Bundle

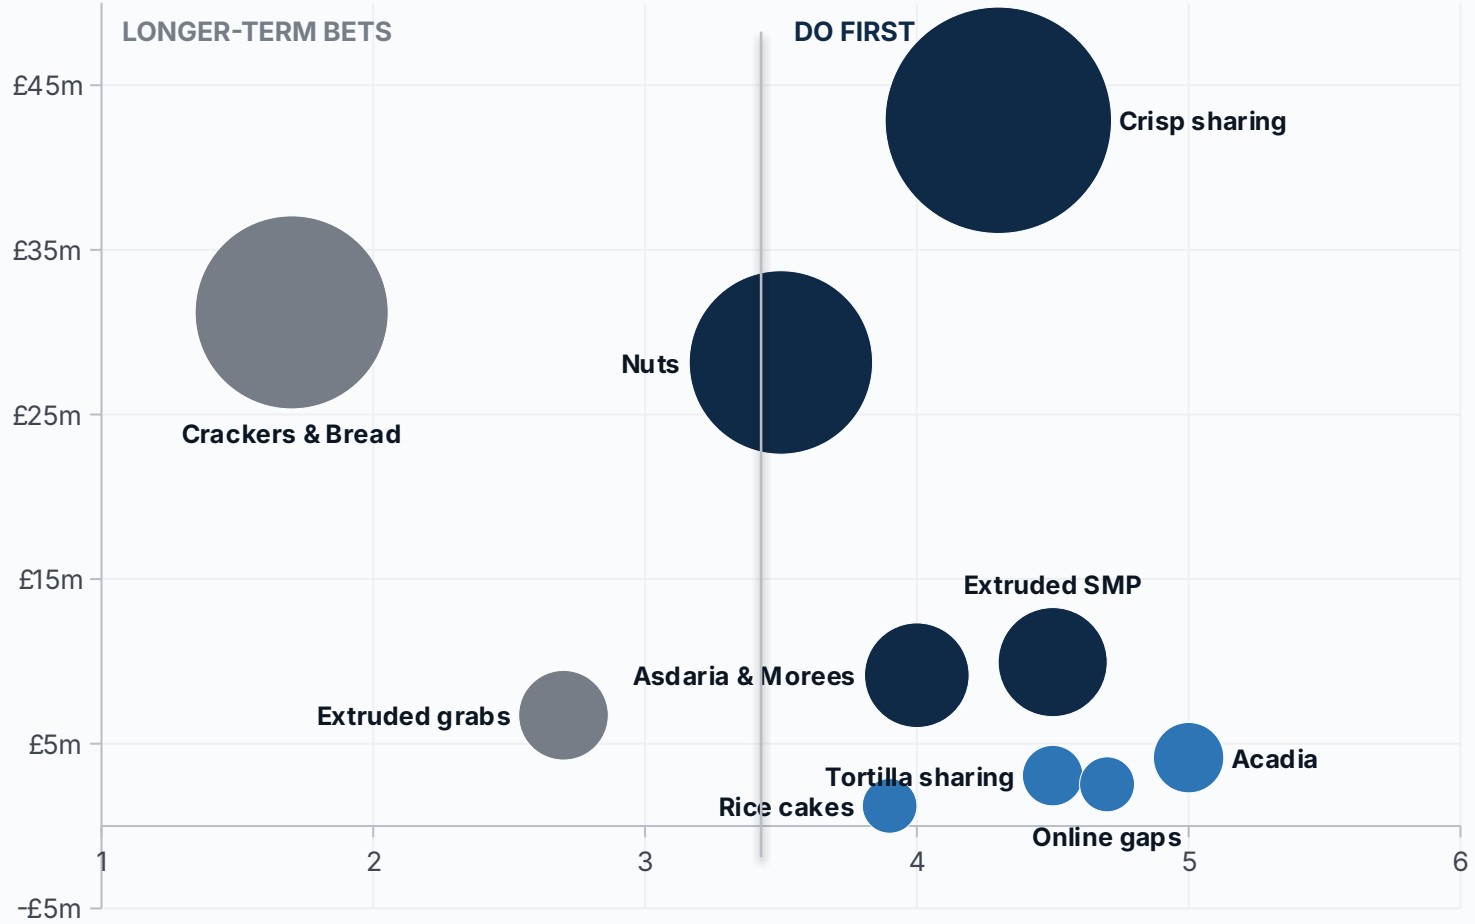

8-week nuts + crisps pilot

4 · Search

Top slots for core sharing lines

Source: case data, 2025 wk 1–47 vs 2024 wk 1–47 (like-for-like) · Calculations: workbook › 9_Acadia

Start with crisp sharing, extruded packs and Acadia; build nuts next; keep crackers as a later option

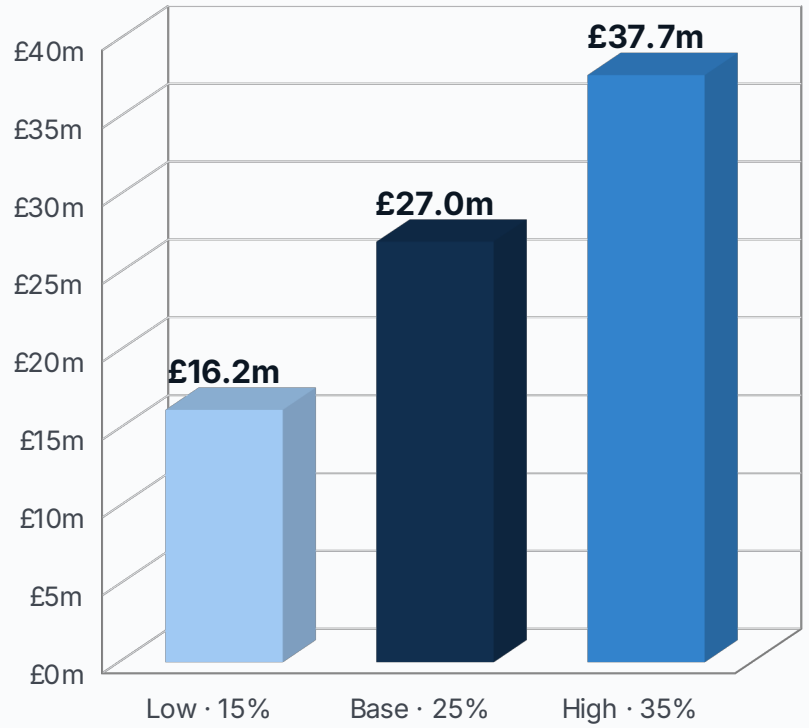

x = ease to execute (1–5, team judgement), y = fair-share headroom £m

1	**Win crisp sharing bags** Penetration / share	**£42.9m**
2	**Fix extruded packs (SMP + grabs)** AWOP	**£16.7m**
3	**Recover Asdaria & Morees** Share	**£9.2m**
4	**Acadia + online gaps** Penetration	**£6.7m**
5	**Nuts via crisps cross-buy** Penetration	**£28.2m**
6	**Crackers & Bread entry** Penetration (new)	**£31.2m**

Source: case data, 2025 wk 1–47 vs 2024 wk 1–47 (like-for-like) · Calculations: workbook › 11_Opportunities

Base case ~£27m of year-1 sales; a 90-day plan tests before it scales

METHOD

Year-1 £ = £108m core headroom × capture %

Capture rates are planning assumptions; replace them with pilot read-outs.

	Days 0–30 · Prepare	Days 31–60 · Pilot	Days 61–90 · Read & scale
Crisp sharing	Price-pack design	Test in 2 retailers	
Extruded packs	Range review	SMP & grabs listings	
Asdaria / Morees	Root cause	Share-recovery plan	
Acadia	Range & search audit	Nuts + crisps pilot	
Data	Panel pull		Crackers case

KPIs

Penetration	AWOP	Share by pack	Online share
% buying	£ per buyer	sharing, MP	vs in-store

APPENDIX A1

Knowns, unknowns, constraints and assumptions

KNOWNS

- Weekly SKU sales 2024–25 by retailer, format, supplier, brand, pack
- Basket value bands by retailer
- Shopper profile (life stage, age, mission) by channel
- Co-purchase % for 7 pairs; CSN basket metrics

UNKNOWNS

- Buyer penetration and AWOP by brand (no household panel)
- Affinity vs base penetration
- Margins, elasticity, promo depth

CONSTRAINTS

- 2025 data ends at week 47 → compare wk 1–47 like-for-like
- Brands anonymised; £ = sales not profit
- Online = e-commerce + pure play only

ASSUMPTIONS

- Fair share = PepsiCo segment share (packs) or 36.9% market share (under-developed)
- Capture 15 / 25 / 35% of core headroom in year 1
- Ease scores = team judgement (editable)
- Brand roles by rule until panel data arrives

Source: case data, 2025 wk 1–47 vs 2024 wk 1–47 (like-for-like) · Calculations: workbook › README

APPENDIX A2

Formula map: how every derived number is calculated

Metric	Formula
Growth %	Sales TY ÷ Sales YA − 1
PepsiCo share	PepsiCo £ ÷ market £
Share change (pts)	(Share TY − Share YA) × 100
£ value of share change	Sales TY × (Share TY − Share YA)
Online index	(online % of segment ÷ online % of total) × 100
Price index	(PepsiCo £/unit ÷ market £/unit) × 100
Share of growth	channel £ change ÷ market £ change
% baskets with CSN · £ per CSN basket	CSN baskets ÷ all baskets · CSN spend ÷ CSN baskets
Implied YA share	Share TY × (1 + mkt growth) ÷ (1 + PepsiCo growth)
Mix index	retailer mix ÷ peer mix × 100
Fair-share headroom	Pack sales × MAX(0, segment share − pack share)
Under-developed segment headroom	Segment sales × (market share − segment share)
Recoverable retailer £	Retailer sales × MAX(0, share YA − share TY)
Year-1 scenario	Core headroom × capture %
Affinity index (to activate)	Co-buy % ÷ base penetration × 100

APPENDIX A3

Risks and mitigations

1	**Cannibalisation**	Sharing bags pull from multipacks	**Read net category £, not just sharing**
2	**Price premium**	Closing the 18% gap hurts margin	**Test price-pack (size) before price cuts**
3	**Bundle dilution**	Discounts subsidise existing buyers	**Target bundles at non-nut buyers online**
4	**Retailer appetite**	Acadia / Asdaria may not give space	**Lead with their own shopper and mix data**
5	**Data gaps**	Roles and deals not yet validated	**Panel pull for penetration, AWOP and affinity in days 0–30**

Source: case data, 2025 wk 1–47 vs 2024 wk 1–47 (like-for-like)
