Associate Product Manager | Business Analyst | Product Discovery & Prioritization | User Stories & Requirements | Product Analytics | AI-Native Workflow | E-commerce & SaaS

PROFESSIONAL SUMMARY

Business Analyst with 5+ years in product-adjacent roles at Flipkart (e-commerce) and Enverus (B2B SaaS), now moving into product management. I start with **why** - using user personas, funnel and cohort data to decide what gets built and what gets cut - then write requirements and user stories, work with engineering and design to ship, and measure what users actually do before iterating. Shipped in-app features (product exchange, loyalty and bank-offer coupons) that moved revenue and conversion, and independently built and launched an AI product. Comfortable with ambiguity and fast cycles; I use AI daily for research, analysis and prototyping.

EXPERIENCE

Flipkart - Business Analyst - Large Appliances (eCommerce Marketplace) | Jun 2024 - Sep 2026

Owned category, seller & SKU performance for a large marketplace category - turning user and market data into in-app features and decisions across GMV, conversion and in-stock.

- Spotted from cohort and SKU trend analysis (YoY & MoM) that high-value SKUs were under-converting; scoped and drove the **product-exchange bump-up feature** for those SKUs, growing category **revenue 19% YoY**.
- Built **user personas, funnel and cohort analysis** to define the problem, then launched **in-app coupons for loyal customers** - capturing category customers and driving a **20% improvement in conversion**.
- Analyzed payment-method and bank behavior across demographics; shipped **South-specific bank-offer coupons in the payment flow**, improving bank-offer adoption and conversion across the South region.
- Used **market research and selection analysis** to make the case for a new segment (Windows); launched it, lifting **Flipkart market-penetration share ~1%**.
- Wrote requirements and worked with **engineering, design, marketing and supply-chain** teams to ship and track changes; built automated **Tableau / Power BI dashboards** (SQL, Google Apps Script) to monitor adoption and KPIs post-launch.
- Built regression-based **demand and sales forecasting** to guide planning; data-driven planning drove a **55% category revenue uplift during Big Billion Days**.

Enverus - Business Analyst I - Market Research (B2B SaaS) | Jan 2023 - May 2024

- Gathered requirements from US commercial stakeholders and built **Tableau / Power BI dashboards** they used daily, supporting **ARR that scaled into the \$500MM range**.
- Re-engineered the reporting workflow with **Lean Six Sigma**, cutting **cycle times 20%** and standardizing KPIs across global teams.

Associate - Commercial Intelligence | May 2021 - Dec 2022

- Published quantitative market research across **3 cycles** and built unit-economics models and competitive intelligence for leadership decisions.

PROJECTS & CERTIFICATIONS

AI Personal Stylist - 0-to-1 AI product, built and launched solo (Streamlit, Python, Generative AI) | [Live Demo](#) | 2026 (Live, iterating)

- Problem:** shoppers don't leave for lack of choice - they leave because there's too much and they can't picture what suits them.
Solution: a chatbot that turns **4 questions** into a style persona and **3 complete looks**, each linked to Google Shopping.
- Product calls:** cut 20 filters down to 4 questions to reduce friction; made personas **change the recommendation, not just the label**; treated **"complete the look"** as a basket-size lever. Shipped, gathering user feedback, and iterating on the next version.

Certifications

- Agile Project Management** - Google • **Generative AI for Leaders** - Vanderbilt University • **Introduction to Generative AI** - Google Cloud
- Mastering Advanced SQL Queries** - Coursera • **From Excel to Power BI** - Knowledge Accelerators • **Customer Value, Acquisition, and Retention** - University of Maryland

SKILLS

Product: Product Discovery | Prioritization & Scoping | User Stories & Acceptance Criteria | Requirements (BRD / FRD) | User Personas | User Flows & Wireframe Review | Product Analytics (Funnel, Cohort, Conversion) | Post-launch Measurement & Iteration | Client / Stakeholder Demos | Agile / Scrum

Tools: Jira | Confluence | SQL | Tableau | Power BI | Advanced Excel | Generative AI / LLM tools (ChatGPT, Claude) | Streamlit | Python (familiarity)

EDUCATION

B.Tech - Biotechnology | Vellore Institute of Technology (VIT) | 2017 - 2021 | GPA: 8.55 / 10

12th (ISC) | Spring Dale College | 2016 | 88% • **10th (ICSE)** | Spring Dale College | 2014 | 88%

LEADERSHIP & ACHIEVEMENTS

- Led operations, logistics & teams for corporate / college events hosting **800-1,000+ participants**.
- Shipped-impact record - **55% BBD category uplift, 19% YoY revenue growth, 20% conversion lift, 20% faster reporting**.
